NIKITA MYSHKIN

DIGITAL ARTIST, PHOTOGRAPHER, ENGINEER

ABOUT ME

After getting my degree in Communication Technologies and Communication Systems I decided to try my fate in pursuing a career in the fields of Arts. In addition to working as a photographer and as a freelance graphic designer I started learning 3D and AR and after that started taking freelance jobs as a 3D and AR artist which led to working with different celebrities and brands.

Now I'm seeking jobs that will push me to the new limits and help me in getting on an international level of projects.
